

New vs existing: average transaction value across four segments

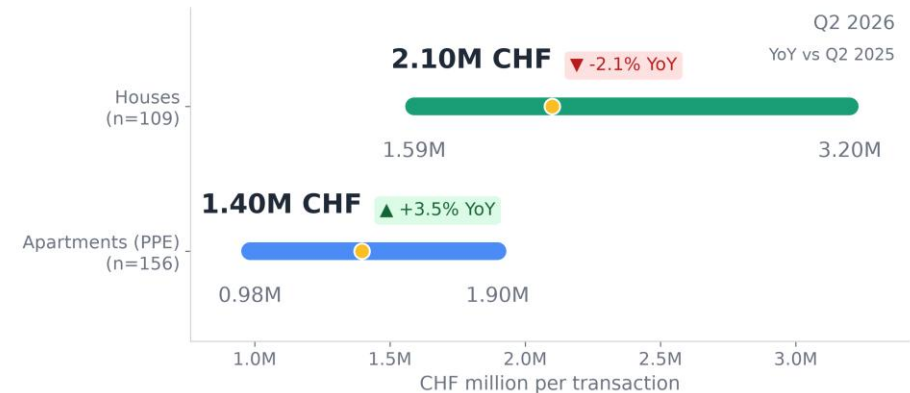

Canton of Geneva · Average ticket (value / n), not median · Quarterly — the only frequency with new vs existing

Source: OCSTAT T 05.05.1.1.01 · YoY % vs same quarter prior year · House average skewed by premium communes

House prices show 2× wider dispersion than apartments

Canton of Geneva · CHF per transaction (not per m²) · Existing stock only

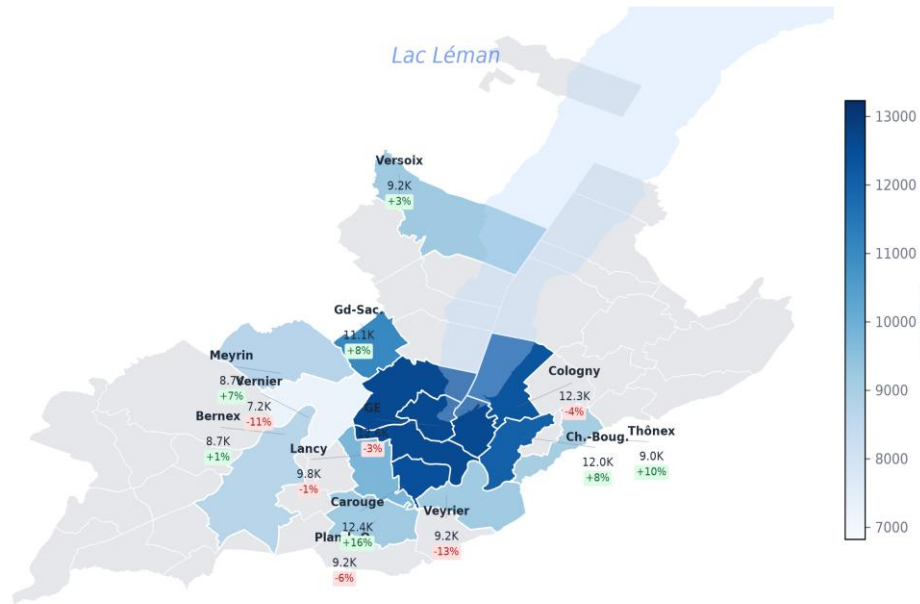

Source: OCSTAT T 05.05.1.1.02 · P25-P75 range, existing stock · YoY % vs Q2 2025

- ▶ Existing houses averaged about 2× the transaction value of existing apartments in Q2 2026 (CHF 3.57M vs CHF 1.76M)
- ▶ The apartment P50–P75 range overlaps with the house P25–P50 range at roughly CHF 1.6–1.9M
- ▶ All figures are completed notarial transactions (OCSTAT), not listings or appraisals. Left chart: average ticket. Right chart: official OCSTAT medians with P25–P75 range.

Apartment prices per m² by commune

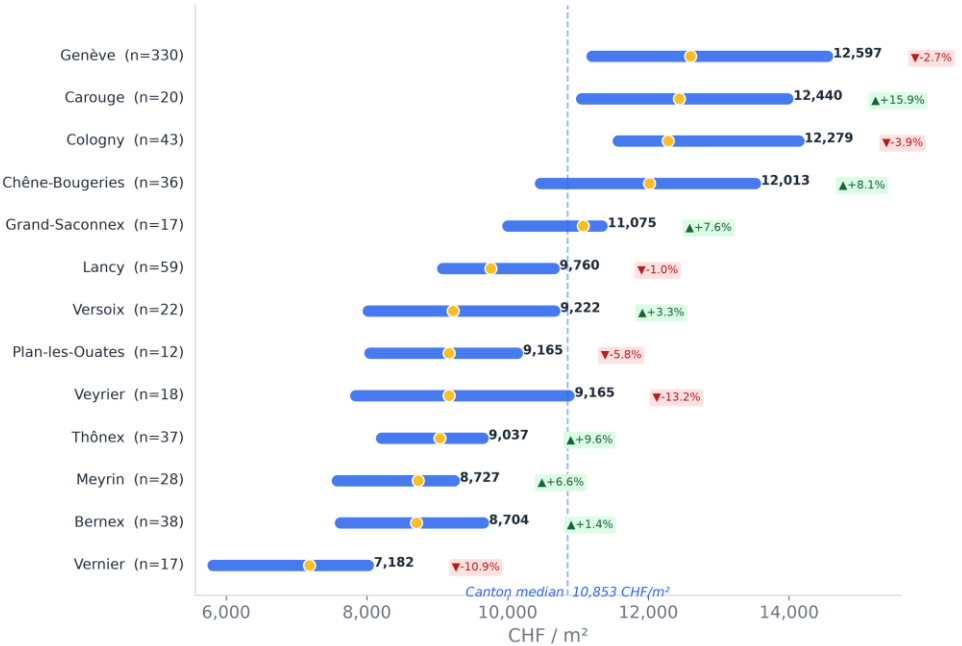

Canton of Geneva · Existing apartments (PPE) · CHF/m² · Free market · 2024

Source: OCSTAT T 05.05.1.4.03 · Notarial transactions · Grey = n<10 (unpublished) · City of Geneva = four sectors combined

Existing apartment prices vary 1.8× across communes

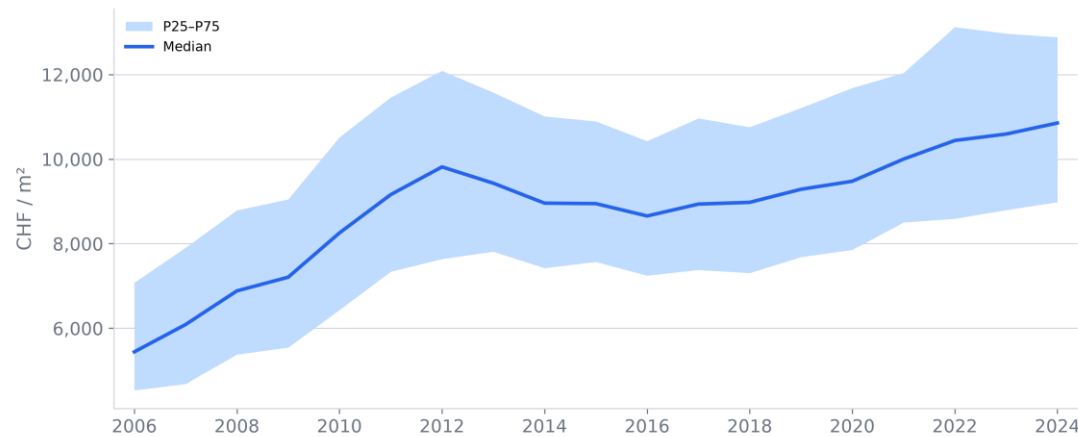

Canton of Geneva · Existing apartments (PPE) · CHF/m² · Free market · 2024

Source: OCSTAT T 05.05.1.4.03 · P25–P75 range · YoY % vs 2023 · Unpublished communes (n<10) omitted

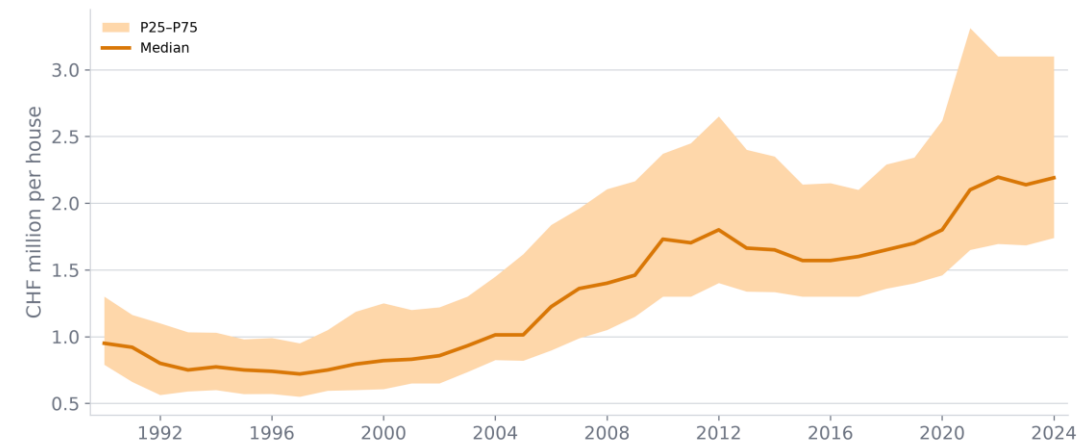

- ▶ 1.8× apartment price gap across communes: 7K CHF/m² in Vernier vs 12.5K in Cologny — same 60m² flat costs 430K vs 740K.
- ▶ Houses even more polarized: Cologny median (6.2M) is 3.7× Vernier (1.7M).
- ▶ "New is cheaper" is a composition effect — within each commune, new apartments cost 17–29% more (see the full version of the report)

Existing apartments: median CHF/m² doubled since 2006

Source: OCSTAT T 05.05.1.4.03 · Existing PPE, free market, canton · Band = P25-P75

Detached houses (all): median per dwelling tripled since 1990

Source: OCSTAT T 05.05.1.3.03 · All detached houses, canton · Band = P25-P75 · Not CHF/m²

- ▶ Apartments ×2 since 2006, houses ×3 since 1990 — no sustained decline after any correction in either market.
- ▶ During downturns, P75 drops 2–3× faster than P25 — expensive segment corrects, the floor holds.
- ▶ Post-2020: house price band widened sharply (premium surge); apartment band stayed stable.
